SUMMARY

Detailed-oriented Computer Science graduate from Arizona State University with hands-on experience in software quality assurance, defect lifecycle management, and full SDLC execution. Seeking a full-time software engineering role in the defense and aerospace industry to contribute to mission-critical systems through strong foundations in C++, Java, Python, Linux, and secure software development practices.

EDUCATION

B.S. Computer Science

May 2026

Arizona State University, Tempe, AZ - 3.5 GPA

Relevant Coursework: OOP, Data Structures and Algorithms, Database Management, Distributed Software Development

A.A.B., Business

May 2022

Mesa Community College, Mesa, AZ - 3.8 GPA

TECHNICAL SKILLS

Programming Languages: C++, C#, Java, Python, SQL

Tools & Platforms: Linux, Git, GitHub Actions (CI/CD), JIRA, Junit, Astah (UML), Microsoft Office Suite

Methodologies: Agile/Scrum, Software Quality Assurance, Test-Driven Development, SDLC, Defect Lifecycle Management

Core Competencies: Data Structures & Algorithms, Object-Oriented Design, Requirements Analysis, Technical Documentation, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Salt River Project: Software QA Tester (Android Mobile App Rewrite Project), Tempe, AZ

02/2021 – 10/2021

- Executed detailed test cases, identified software bugs, and worked with developers on fixes.
- Streamlined defect reporting and documentation, ensuring reproducibility and alignment with quality standards
- Enhanced user accessibility by collaborating with cross-functional teams to test app features.

Salt River Project: Billing, Tempe, AZ

10/2021 – 10/2023

- Performed billing validations and discrepancy analyses using Excel.
- Conducted QA on internal reporting tools and presented findings to stakeholders.

Salt River Project: Customer Service Representative, Tempe, AZ

03/2019 – 10/2021

- Handled over 12,000 customer calls with 100% first-call resolution and a 99.7% satisfaction score.
- Recognized for delivering high-efficiency service and maintaining top-tier KPIs.

PROJECTS

Landline Mobile Application (Android Application), Senior Capstone

Fall 2025 - Present

Led development of a communication-focused application that filters non-essential notifications while preserving emergency communication channels.

- Designed technical requirements, user flow documentation, and UI specifications.
- Managed sprints and backlog in JIRA following Agile/Scrum methodology.
- Developed and executed unit tests to validate reliability and edge-case handling.

Sun Devil Bookstore (Software Application), Class project

Fall 2024

Collaborated in a team of five on a full SDLC project spanning requirements analysis, design, implementation, and testing.

- Designed UML use case and class diagrams; developed a functional testing plan.
- Implemented core features using Java and OOP techniques; delivered final presentation and live demo.

Personal Finance Tracker, Personal Project

Fall 2025 – Present

Designed and built a data-driven application that tracks financial instruments and generates optimized debt payoff strategies.

- Architected with MVVM pattern, dependency injection, and local database persistence following clean architecture principles.
- Managed full Agile/Scrum development in JIRA across 10 sprints with CI/CD pipeline via GitHub Actions.
